

WASTE CONTROL SYSTEMS' PRODUCT LINE

Our purpose is to provide your organization with the products for the storage and disposal of hazardous and radioactive materials. Through our code knowledge we are able to recommend safer usage, storage options, and the most effective reduction and disposal methods. The results are a safer, cleaner, and more profitable facility.

Cost-Crushing Systems

In-Drum Compaction Systems

- Configured for waste stream
- Engineered for various containers

Paint Can and Pail Crushers

- Product recovery
- Empty container recycling

Fluorescent Lamp Disposer

- Traps mercury vapor in filter
- 600 lamps in a 55-gallon drum

Oil Filter Crusher

- Reclaim used oil
- Filter in form for recycling

Stationary Compactors

- Reduce disposal fees
- Minimize waste pickups

Drum Crushers

- Recycle steel drums
- Recover product

Plastic Pail Cryo-Smasher

- Freeze and shatter
- Reduce volume for disposal

Balers

- Recycle baled materials
- Horizontal or vertical units

Cost-Saving Systems

Propane Cylinder Recycling System

- Recycle steel cylinders
- Tag to identify vented cylinders

Cryo-Cleaner

- No need for soaps or solvents
- Cleans residues from containers

Aerosol Can Recycling System

- Recycle the can and contents
- Residual propellant is filtered of VOCs

Drum Seal

- Secure product shipments
- Permanent serial number for tracking

Cost-Containing Systems

Square Drum 71-Gallon

- Maximize storage efficiency
- DOT 7A Type A or Strongtight

LSA Containers

- Steel, aluminum, or shielded
- 15 cubic feet to 2,500 cubic feet

Intermodal Containers

- Sludge, liquids, or ashes
- DOT 7A Type A

5-Gallon Shipping Pail

- Certified for air transport
- DOT 7A Type A solids or liquids

Polyethylene Drums

- 15-gallon to 55-gallon
- Open or closed head

Steel Drums 30 to 55-gallon

- UN certified, DOT 7A Type A
- Open or closed head

Overpacs

- For drums or boxes
- Polyethylene or steel

Chemical Transfer Systems

- Pumping carts
- Closed-loop systems

Intermediate Bulk Containers

- Full diameter open top
- Self cleaning

Fabric Tension Structures

- Enclose remediation sites
- Rapid assembly

Pre-Fabricated Storage Buildings

- 2 to 200-drum capacity
- Fire rated

Cost-Cutting Systems

Hook Shear Shredders

- Product destruction
- Size reduction

Hammermills

- Crush or powder materials
- Laboratory to production sizes

Scrap Choppers

- 30 cubic yards of banding in 2 drums
- Better housekeeping and safety

Sheathing Stripper

- Recover valuable metals
- Separate plastic sheathing

Working With Us Means Service.

Our work really begins when you choose us as a vendor. We provide:

- **Code Knowledge.** We work to provide only what your facility needs—no overselling.
- **Turnkey Installations.** We ensure the product is installed properly.
- **Sales, Service, and Leasing.** Available for all product lines.
- **A Long-Term Attitude.** We want to do business with you now and in the future.

We can help you handle your flammable, radioactive, and hazardous materials from receipt to disposal.
