

CARBON FILTRATION PACKAGE

**Designed to easily attach to any of
TeeMark Aerosol Crushers as well
as the Super 6PJ-VC.**

G-3PTM

This carbon filtration package is designed to connect to the Super 200, Super 450, Super 800, and the Super 6PJ-VC. In addition, any TeeMark Machine that has an optional Vapor Control Package will readily receive the Carbon Filter.

The Carbon Filtration Package can be added after installation of the machine should your regulations change.

Each drum contains 145-pounds of Carbon and a Saturation Indicator. The Saturation Indicator provides positive indication the Carbon has reached it's saturation point.

Package specifications:

Handles up to 500 cfm of air.
Max Static Pressure is 10psi
Size; 24 inches diameter X 34 inches high
Weight is 190 pounds.
Inlet Duct Size; 5 inch
Exhaust Duct; 5 inches.

TEEMARK MFG.
