The **Super 200** is an aerosol can crusher that automatically opens, empties and crushes **200 aerosol cans per hour**.

Processes many different aerosol can sizes with a wide range of can contents. Separates liquid can content from propellants, VOCs and other gaseous components. Also handles small paint cans. Removes and captures 99% of can contents. **Provides** an automatic processing Cycle that begins when the operator inserting the can into crushing chamber, and pulling the two handles. **Utilizes** explosion proof piercing and crushing systems that have proven themselves on millions of paint cans and pails. **Incorporates** a blower that pull VOCs and propellants from in and around crushing chamber to create a "PTE" permanent total enclosure.

Explosion Proof!

The Super 200 has an explosion proof motor, blower and electrical controls. Class 1, Div. 1 & 2, Group D

SPECIFICATIONS

Crushing Force: up to 12,000 lbs

Operating Cycle Time: 9 Seconds

Dimensions: 90 inches high, 31 inches wide, 26 inches deep

Shipping Weight: 900

Crushing Dimensions: 5-1/2 X 7 X 12-3/4

ELECTRICAL REQUIREMENTS

Crusher: 3/4hp, 115/230 volts, 11/6 amp, single-phase

Collection System: 1/2hp, 115/230 volt, 7/4 amp, single-phase

Runs on a single 20 amp, 115 volt circuit

Warranty: 6 month limited on materials and workmanship
